LimbusWall Quingenti

Wall absorbent

Design: Team Glimakra

The name Quingenti comes from the Latin word for 500. 500 mm is the common denominator for all variants. The relatively small panels with its beveled edge of 10x10 mm gives Quingenti its personality. The fabric is nailed to the solid body with high quality and precision. With LimbusWall Quingenti you can give the room a lot of character and absorption and create unique patterns with different mounting options. The large selection of standard fabrics provide almost unlimited opportunities to create beautiful and functional wall environments. The panels are easy to install using the panel click button connectors.

INSTALLATION

The panels are easily mounted using panel click button connectors.

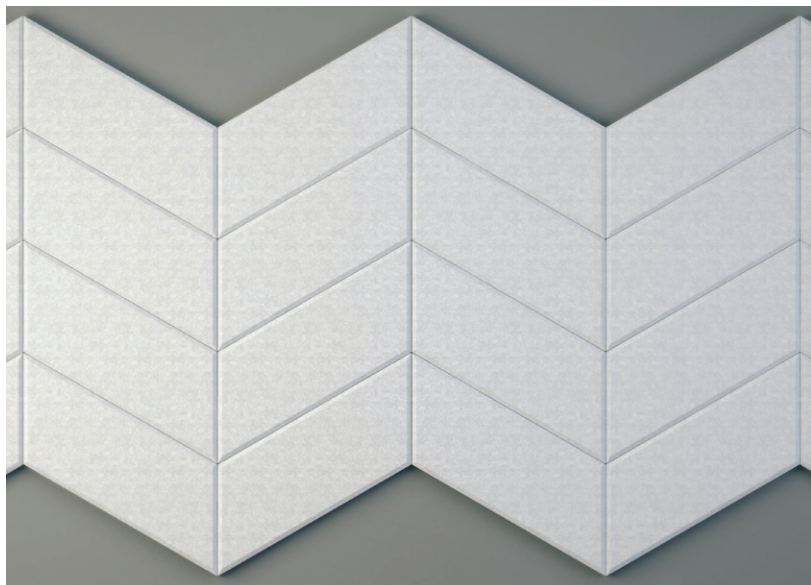

1. The panels are provided with a number of pre-drilled holes. Mount two female buttons per panel. Place the distance buttons on opposite sides.
2. Click the locator button on the female button.
3. Press the panel towards the wall to make a drillmark. Remove the locator button from the female button.
4. Mount the male button on the wall.
5. Press and click the panels on the wall one by one.
