QUINGENTI

Quingenti är en samling nya väggabsorbenter inom Limbusfamiljen. När vi letade efter en röd tråd för de olika mönstren utgick vi ifrån de gemensamma sammahållande yttermåtten 500 mm, som gav kollektionen dess namn "Quingenti", som betyder 500 på latin.

Quingenti finns i sex olika geometrier; cirkel, triangel, hexagon, kvadrat, romb och romboid. För att ge väggabsorbenterna karaktär har vi skapat en kant med fasning på 10 x 10 mm runtom varje absorbent som fångar ljuset vackert. I framtagningen av Quingenti har vi omsorgsfullt valt ut ett antal förslag på tyger och kulörer som vi tror kan inspirera till vackra och funktionella väggmiljöer.

Quingenti is a new collection of wall absorbents within the Limbus Family. When looking for a thread through the different patterns we started from the common outer dimensions of 500 mm. From this the collection got its name "Quingenti", which means 500 in Latin.

Quingenti is available in six different geometries; circle, triangle, hexagon, square, rhombus and rhomboid. To give the wall absorbents character we created a beveled edge of 10 x 10 mm around each panel that catches the light beautifully. In the development of Quingenti we have carefully selected a number of suggestions of fabrics and colors that we believe can inspire to beautiful and functional wall environments.

Quingenti har mycket hög ljudabsorption och består endast av miljövänliga material. Variationsmöjligheterna är stora med sex olika geometrier med det gemensamma måttet 500 mm. Beroende på hur väggabsorbenterna roteras och kombineras, kan minst 13 standardmönster skapas. Upphängningen sker med monteringsknappar.

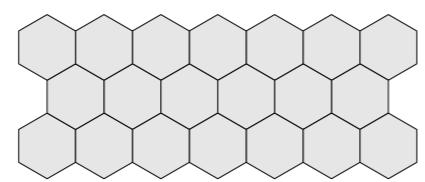

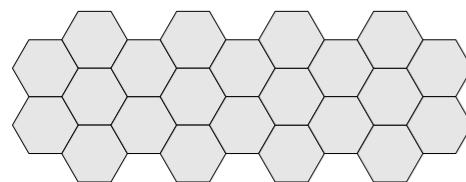

Quingenti has very high sound absorption and consists only of environmentally friendly materials. Six different geometries, with the common measure of 500 mm, gives endless possibilities. At least 13 standard patterns can be created depending on how the wall absorbents are rotated and combined. Panel click button connectors are used for hanging.
