LimbusBarn & Fences

Acoustic workplaces and floor screens

Design: Johan Kauppi

A family of repeatable room dividers and a muted pavilion, for meetings and work. The design has a clear horizontal expression, inspired by the landscape of Swedish Lapland. The system is based on identical acoustic baffles of fabric, mounted at consistent distances, giving the furniture a balanced combination of sound absorption and transparency, for large-scale repetition in public interiors.

DIMENSIONS

LimbusBarn

Width: 2366 mm
 Depth 2300 mm
 Height: 2945 mm
 Weight: 400 kg

LimbusFences 4

Width: 1200, 1600 mm
 Height: 1103 mm
 Weight: 38 kg, 42 kg
 Thickness: 33 mm (panels),
 30 mm (pipes)

LimbusFences 6

Width: 1200, 1600 mm
 Height: 1550 mm
 Weight: 46 kg, 54 kg
 Thickness: 33 mm (panels),
 30 mm (pipes)

DESCRIPTION

LimbusBarn has a white metal frame in 40 mm square tubes. The parts are coupled with hidden connection angles. 32 panels that form walls and roof are hooked onto the frame. The floor is a 15 mm single-piece parquet floor in white-painted ash wood. It is placed on the 40 mm frame and cellular plastic. Lamp hooks, cable ducts and a double power outlet are standard. The housing has a polyester felt to protect against the floor.

Panels: 19 mm Lightweight MDF with 6 mm polyether and fabric. Matching colours in fabric piping.

Metal frame: Powder coated NCS S 0500-N White
 100% recyclable material.

Ask Air is a 1-pole floor with a refined expression in a clean,

exclusive sorting and a light white shade. The four-sided microfase around each board highlights the classic shelf format. The ultra-matte surface minimizes the reflections of the light and allows the colour and feel of the floor to come to its fullness while protecting the wood from daily wear.

Detailed Description - Naturally occurring variations in the wood colour are allowed. The product has medium, black twigs. The quays can vary in size and number.

Colour change - Coloured product, visible change over time.
 Ultra-finished lacquer. Hardness (Brinell Value) 4.0

White grounded double outlet located at the center post on one side. Electrical connection must be done by a qualified electrician.

LimbusFences has 4 or 6 sound absorbing panels that hooks up with air gap between 30 mm white powder coated pipes. Between the screens, there are connecting pipes and the outer edges have endpipes. Each pipe is mounted on a 300 mm rectangular metal plate.

FABRIC AND PIPING

Look in Product sheet Fabric and piping.pdf for our standard fabrics, you can download it here: <http://glimakra.com/en/download/>

MOUNTING

LimbusBarn: The frame is screwed together with hidden connecting angles. The panels are hooked with neck braces on the outside of the body. The floor is dimensionally sized and clipped on top of cellular plastic and square tubes. An aluminum threshold frame is screwed along both edges.

LimbusFences: The panels with integrated brackets hatch quickly in the endpipe and coupling pipes with integrated coupling brackets. Then the feet are mounted and the screens can be raised to complete the assembly with the top and bottom coupling tabs.
