

New - LimbusReception Lodge

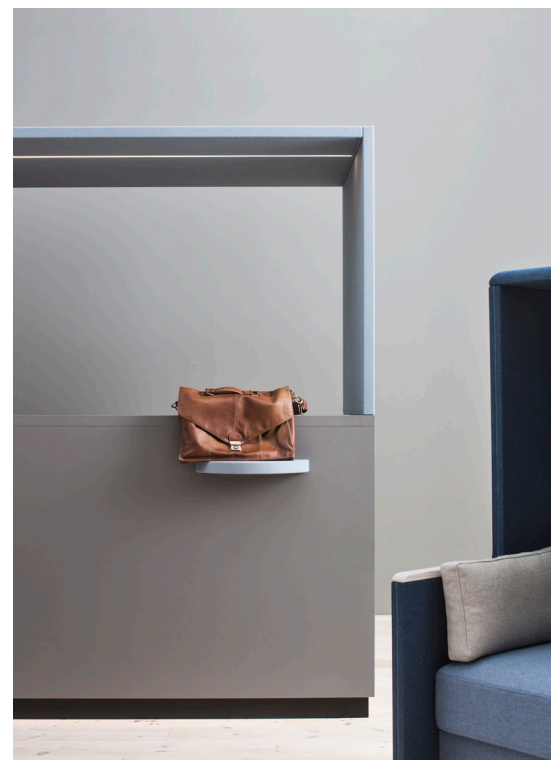

Design: Joel Karlsson, Krook & Tjäder Design

HALL 10.2
STAND J.016

GLIMAKRA
OF SWEDEN

LimbusReception Lodge, designed by Joel Karlsson, Krook & Tjäder Design, is a system of modular designed reception desks. The design is well suited to the requirements of modern entrances and other meeting places. New and unique characteristics by Lodge is the sound absorbing ceiling that frames and gives privacy. The ceiling together with the extremely matt Nanotech surface enhances a soft impression while the straight design from Limbus by Glimakra is maintained.

Lodge is a great piece of furniture when welcoming and also as a touchdown space in an activity-based workplace. The roof on Lodge frames the reception while its properties regarding absorption is maximized for the visitor's and the staff's convenience. To meet the increasing use of portable technology Lodge is equipped with an USB port that is easily accessible.

The expression of Lodge is about material meetings and structures. It becomes clear with the fabric-covered shelf and the practical garment hook.
