GLIMAKRA
OF SWEDEN

THE HOME OF ACOUSTIC DESIGN

Glimåkra village has been at the heart of our design and production for over 70 years. Here – surrounded by shimmering lakes, prosperous fields and forests – we create acoustic products and furniture with a high level of design and craftsmanship.

We take great pride in collaborating with local suppliers, always with immediate access to the renewable resources of the forest. By tradition our cabinet-makers and designers work side by side under the same roof, with a craftsmanship that is passed down the generations.
But we also continue to evolve and renew our processes, in order to make our long-lived products more sustainable in every part of life.

Our long-term focus on design, quality and a responsible production has been acknowledged through several international design awards, and as we move into a circular future, we continue to create products that stand the test of time – over and over again.
