Sail

Floor screen / Mobile writing board

Design: WEBB Associates Ltd

Sail is a flexible and elegant screen inspired by a sailboat. With a base resembling a hull and a mast for panels in fabric, whiteboard, or cork, it combines form and function. It's ideal for offices and meeting rooms, and its sound-absorbing properties make it perfect for open-plan workspaces where noise can be a challenge.

DIMENSIONS

Sail is available in three heights: Small, Medium and Large. The screen always consists of one narrow sail (600 mm) and one wide sail (750 mm).

DESCRIPTION

There are 7 basic variants consisting of a base foot, mast, and 2 frames.

Frame: Integrated 20x10 mm magnets in keyhole fittings for panel attachment. Medium and large frames are prepared for whiteboards, which require extra magnets.

Base: Solid ash, 850x375x40 mm. Four recessed 360° ball-bearing wheels for easy mobility. The base includes a metal mast holder that reinforces the mast attachment. A stained finish is available as an option.

Mast: Two-part mast made of solid ash, mounted onto the base and mast holder. Available in three lengths. A stained finish is available as an option.

Mounting: One mast is mounted onto a base and fitted with two frames. Panels made of fabric, cork, or whiteboard can be attached to the frames. These complete panels are referred to as "sails." The panels come with pre-mounted magnetic discs that attach to the magnets in the frame, making assembly very simple.

ACCESSORIES

Whiteboard made of sheet metal with whiteboard powder coating.

White coat hook strip with 4 hooks.

White metal mounting brackets, available in single and double versions.

FABRIC

See our product sheet **Fabric and piping** for our standard fabric options. Available for download here:
