GLIMAKRA
OF SWEDEN

Cocoon is a sound-absorbing armchair designed for privacy, rest and concentration. Its enveloping shape with softly rounded lines creates a sheltered room within a room – ideal for schools, healthcare environments, hotels and activity-based offices. The armchair can be used as a quiet zone or as a personal listening space, with integrated LED lighting and the option to play audio via Bluetooth. The carefully considered design reduces both visual and acoustic stimuli, supporting improved focus, mental recovery and a sense of calm. Available in a standard- and a basic-version.

DIMENSIONS

Weight [kg]: 75kg
